<b>Synonyms</b>	INO80S
<b>Specificity</b>	<p><b>Mouse anti Human YY1 antibody</b> recognizes the transcriptional repressor protein YY1, also known as INO80 complex subunit S or Yin and Yang 1 protein.</p> <p>The protein YY1 is a ubiquitously-expressed zinc finger transcription factor which can act as an activator or repressor of transcription under different circumstances (<a href="#">Galloway et al. 2017</a>). In addition to transcriptional regulation, YY1 is involved with cell proliferation, chromatin remodeling and apoptosis. Many targets of YY1, for example ERBB2 and p53, are involved with cancer pathogenesis (<a href="#">Kaufhold et al. 2016</a>). Accordingly, YY1 is overexpressed in multiple cancer types, and overexpression is correlated with poor prognosis (<a href="#">Cho and Bonavida 2017</a>). YY1 may be inhibited by siRNA, proteasome inhibitors, and a variety of other factors. Inhibition of YY1 has been suggested as a potential target in cancer (<a href="#">Bonavida 2017</a>).</p>
<b>Western Blotting</b>	Anti YY1 detects a band of approximately 62 kDa in Jurkat cell lysates.
