

Datasheet: VMA00579 BATCH NUMBER 161202

Specificity: NFKB p52 Format: Purified Product Type: PrecisionAb Monoclonal Clone: 9D2 Isotype: IgG2b			
Format: Purified Product Type: PrecisionAb Monoclonal Clone: 9D2 Isotype: IgG2b	Description:	escription: MOUSE ANTI NFKB p52	
Product Type: PrecisionAb Monoclonal Clone: 9D2 Isotype: IgG2b	Specificity:	NFKB p52	
Clone: 9D2 Isotype: IgG2b	Format:	Purified	
Isotype: IgG2b	Product Type:	PrecisionAb Monoclonal	
	Clone:	9D2	
Quantity: 100 μl	Isotype:	lgG2b	
	Quantity:	100 μΙ	

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	-			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click here to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human	
Product Form	Purified IgG - liquid	
Preparation	Mouse monoclonal antibody purified by affinity chromatography	on Protein G from ascites
Buffer Solution	HEPES buffered saline	
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin <50% Glycerol	
Approx. Protein Concentrations	IgG concentration 0.5 mg/ml	

Immunogen	E. coli-derived recombinant human NFkB p52 (amino acids 1 - 454)
External Database Links	UniProt: Q00653 Related reagents Entrez Gene: 4791 NFKB2 Related reagents
Synonyms	LYT10
Specificity	Mouse anti Human NFkB p52 antibody recognizes nuclear factor NF-kappa-B p100 subunit, also known as lymphocyte translocation chromosome 10 protein, nuclear factor Kappa-B subunit 2, nuclear factor of Kappa light chain gene enhancer in B cells 2, oncogene Lyt-10 or transcription factor NFKB2. The NFKB2 gene encodes one of the subunits of the transcription factor complex nuclear factor-kappa-B (NFkB). The NFkB transcription factor complex is expressed in numerous cell types and functions as a central activator of genes involved in inflammation and immune function. The NFkB complex can consist of different subunits that form both homo- or heterodimers which bind specific kappa-B elements in target genes. NFKB2 encodes the p100 subunit that is processed into the active p52 subunit. This protein can function as both a transcriptional activator and repressor, depending on its dimer partner. Alternate splicing results in both coding and non-coding variants (provided by RefSeq, May 2012). Mouse anti Human NFkB p52 antibody detects a band of 52 kDa. The antibody has been
	extensively validated for western blotting using whole cell lysates.
Western Blotting	Anti NFkB p52 detects a band of approximately 52 kDa in Raji cell lysates
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
Guarantee	12 months from date of despatch
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.
Health And Safety Information	Material Safety Datasheet documentation #20359 available at: https://www.bio-rad-antibodies.com/SDS/VMA00579 Antibody (20359)
Regulatory	For research purposes only
