

Datasheet: VMA00589KT

Description:	NCK ANTIBODY WITH CONTROL LYSATE		
Specificity:	NCK		
Format:	Purified		
Product Type:	PrecisionAb™ Monoclonal		
Isotype:	lgG1		
Quantity:	2 Westerns		

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	•			1/1000

PrecisionAb antibodies have been extensively <u>validated for the western blot application.</u> The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human	
Species Cross Reactivity	Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species.	
Product Form	Purified IgG - liquid	
Preparation	20μl Mouse monoclonal antibody purified by affinity chromatography Protein G from ascites	
Buffer Solution	HEPES buffered saline	
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin <50% Glycerol	
Immunogen	E. coli-derived recombinant human NCK	
External Database Links	UniProt: P16333 Related reagents Entrez Gene: 4690 NCK1 Related reagents	
Synonyms	NCK	

Specificity	Mouse anti Human NCK antibody recognizes the cytoplasmic protein NCK1, also known as NCK tyrosine kinase, SH2/SH3 adaptor protein NCK-alpha, melanoma NCK protein or non-catalytic region of tyrosine kinase.
	The protein encoded by NCK1 gene is one of the signaling and transforming proteins containing Src homology 2 and 3 (SH2 and SH3) domains. It is located in the cytoplasm and is an adaptor protein involved in transducing signals from receptor tyrosine kinases to downstream signal recipients such as RAS. Alternatively spliced transcript variants encoding different isoforms have been found (provided by RefSeq, Jun 2010).
	Mouse anti Human NCK antibody detects a band of 47 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
Western Blotting	Anti NCK detects a band of approximately 47 kDa in Jurkat cell lysates
Instructions For Use	Please refer to the <u>PrecisionAb western blotting protocol.</u> For additional information on secondary antibody dilution and exposure time see product web page.
Lysate Composition	400μg Jurkat lysate lyophilized in RIPA buffer
Lysate Reconstitution	- If using DDT reconstitute the lyophilized lysate with 190 μ l DI H ₂ O, add 200 μ l 2x Laemmli Sample Buffer and 10 μ l 2M DTT.
	- If using BME reconstitute the lyophilized lysate with 180 μ l DI H $_2$ O, add 200 μ l 2x Laemmli Sample Buffer and 20 μ l BME.
	Heat at 95°C for 5 minutes. For 10 well mini gels load 25μl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.
Storage	Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
	Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.
Guarantee	As supplied, 12 months from date of despatch.
Acknowledgements	PrecisionAb™ is a trademark of Bio-Rad Laboratories.
