<b>Specificity</b>	<p><b>Mouse anti Human peroxiredoxin 6 antibody</b> recognizes peroxiredoxin 6 (PRDX6), also known as PRX, p29, AOp2, NSGPx or acidic calcium-independent phospholipase A2.</p> <p>The protein encoded by this gene is a member of the thiol-specific antioxidant protein family. This protein is a bifunctional enzyme with two distinct active sites. It is involved in redox regulation of the cell; it can reduce H<sub>2</sub>O<sub>2</sub> and short chain organic, fatty acid, and phospholipid hydroperoxides. It may play a role in the regulation of phospholipid turnover as well as in protection against oxidative injury (provided by RefSeq, Jul 2008).</p> <p>Mouse anti Human peroxiredoxin 6 antibody detects a band of 26 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
