

Datasheet: VMA00612 BATCH NUMBER 170517

Description:	MOUSE ANTI KBNB1	
Specificity:	KBNB1	
Format:	Purified	
Product Type:	PrecisionAb Monoclonal	
Clone:	AB04/1A8	
Isotype:	lgG2b	
Quantity:	100 μΙ	

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	•			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click here to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human			
Species Cross Reactivity	Reacts with: Mouse, Rat N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.			
Product Form	Purified IgG - liquid			
Preparation	Mouse monoclonal antibody purified by affinity chromatograpy on Protein G from ascites			
Buffer Solution	Phosphate buffered saline			
Preservative	0.09% Sodium Azide (NaN ₃)			

Stabilisers

Immunogen	E. coli-derived recombinant human KBNB1 (aa 1-155)
External Database Links	UniProt: Q14974 Related reagents
	<u>Q14974</u> <u>Related reagents</u>
	Entrez Gene:
	3837 KPNB1 Related reagents
Synonyms	NTF97
Specificity	Mouse anti Human KBNB1 antibody recognizes KPNB1, also known as importin Beta 1, PTAC97, IPO1, IMB1 or NTF97.
	Nucleocytoplasmic transport, a signal- and energy-dependent process, takes place through nuclear pore complexes embedded in the nuclear envelope. The import of proteins containing a nuclear localization signal (NLS) requires the NLS import receptor, a heterodimer of importin alpha and beta subunits also known as karyopherins. Importin alpha binds the NLS-containing cargo in the cytoplasm and importin beta docks the complex at the cytoplasmic side of the nuclear pore complex. In the presence of nucleoside triphosphates and the small GTP binding protein Ran, the complex moves into the nuclear pore complex and the importin subunits dissociate. Importin alpha enters the nucleoplasm with its passenger protein and importin beta remains at the pore. Interactions between importin beta and the FG repeats of nucleoporins are essential in translocation through the pore complex. The protein encoded by this gene is a member of the importin beta family. Two transcript variants encoding different isoforms have been found for this gene (provided by RefSeq, Feb 2013).
	Mouse anti Human KBNB1 antibody detects a band of 97 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
Western Blotting	Mouse anti KBNB1 antibody detects a band of approximately 97 kDa in K562 cell lysates
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles
Guarantee	12 months from date of despatch
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/VMA00612 Antibody (10040)
Regulatory	For research purposes only
