

Datasheet: VMA00636

Description:	MOUSE ANTI PROTEIN KINASE C EPSILON
Specificity:	PROTEIN KINASE C EPSILON
Format:	Purified
Product Type:	PrecisionAb™ Monoclonal
Clone:	CD04/1C7
Isotype:	IgG2b
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

PrecisionAb antibodies have been extensively [validated for the western blot application](#). The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species.
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Immunogen	<i>E. coli</i> -derived recombinant human protein kinase C epsilon (aa 301-737)
External Database Links	<p>UniProt: Q02156 Related reagents</p> <p>Entrez Gene: 5581 PRKCE Related reagents</p>

Synonyms

PKCE

Specificity

Mouse anti Human protein kinase C epsilon antibody recognizes protein kinase C epsilon type also known PKCE.

Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by PRKCE is one of the PKC family members. This kinase has been shown to be involved in many different cellular functions, such as neuron channel activation, apoptosis, cardioprotection from ischemia, heat shock response, as well as insulin exocytosis. Knockout studies in mice suggest that this kinase is important for lipopolysaccharide (LPS)-mediated signaling in activated macrophages and may also play a role in controlling anxiety-like behavior (provided by RefSeq, Jul 2008).

Mouse anti Human protein kinase C epsilon antibody detects a band of 91 kDa. The antibody has been extensively validated for western blotting using whole cell and tissue lysates.

Western Blotting

Mouse anti protein kinase C epsilon antibody detects a band of approximately 91 kDa in mouse brain lysate

Instructions For Use

Please refer to the [PrecisionAb western blotting protocol](#). For additional information on secondary antibody dilution and exposure time see product web page.

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles

Guarantee

As supplied, 12 months from date of despatch

Acknowledgements

PrecisionAb™ is a trademark of Bio-Rad Laboratories
