

Datasheet: VMA00650KT

Description:	APPL1 ANTIBODY WITH CONTROL LYSATE		
Specificity:	APPL1		
Format:	Purified		
Product Type:	PrecisionAb™ Monoclonal		
Clone:	G03/2H2		
Isotype:	lgG1		
Quantity:	2 Westerns		

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting				1/1000

PrecisionAb antibodies have been extensively <u>validated for the western blot application</u>. The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Product Form Preparation Buffer Solution Preservative Stabilisers Immunogen	Human Purified IgG - liquid 20µl Mouse monoclonal antibody purified by affinity chromatograpy	
Preparation Buffer Solution Preservative Stabilisers Immunogen		
Buffer Solution Preservative Stabilisers Immunogen	20μl Mouse monoclonal antibody purified by affinity chromatograpy	
Preservative Stabilisers Immunogen	supernatant	on Protein G from tissue culture
Stabilisers Immunogen	Phosphate buffered saline	
_	0.09% Sodium Azide (NaN ₃)	
	E. coli-derived recombinant human APPL1 (aa 1-373)	
External Database Links	UniProt: Q9UKG1 Related reagents Entrez Gene: 26060 APPL1 Related reagents	
Synonyms	APPL, DIP13A, KIAA1428	

Spec	ific	ity
------	------	-----

Mouse anti Human APPL1 antibody recognizes APPL1, also known as DCC-interacting protein 13-alpha, AKT2 interactor or signaling adaptor protein DIP13alpha.

The protein encoded by APPL1 has been shown to be involved in the regulation of cell proliferation, and in the crosstalk between the adiponectin signalling and insulin signalling pathways. The encoded protein binds many other proteins, including RAB5A, DCC, AKT2, PIK3CA, adiponectin receptors, and proteins of the NuRD/MeCP1 complex. This protein is found associated with endosomal membranes, but can be released by EGF and translocated to the nucleus (provided by RefSeq, Jul 2008).

Mouse anti Human APPL1 antibody detects a band of 83 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Mouse anti APPL1 antibody detects a band of approximately 83 kDa in HEK293 cell lysates

Instructions For Use

Please refer to the PrecisionAb western blotting protocol. For additional information on secondary antibody dilution and exposure time see product web page.

Lysate Composition

400µg HEK293 lysate lyophilized in RIPA buffer

- Lysate Reconstitution If using DDT reconstitute the lyophilized lysate with 190µl DI H₂O, add 200µl 2x Laemmli Sample Buffer and 10µl 2M DTT.
 - If using BME reconstitute the lyophilized lysate with 180µl DI H₂O, add 200µl 2x Laemmli Sample Buffer and 20µl BME.

Heat at 95°C for 5 minutes. For 10 well mini gels load 25µl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.

Storage

Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.

Shelf Life

As supplied, 12 months from date of despatch
