

Datasheet: VMA00666

Description:	MOUSE ANTI TRANSCRIPTION REGULATOR ERG
Specificity:	TRANSCRIPTIONAL REGULATOR ERG
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	OTI5D10
Isotype:	IgG2a
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography on Protein A from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin <50% Glycerol
Immunogen	HEK293-derived full length recombinant human transcriptional regulator ERG
External Database Links	UniProt:

[P11308](#) [Related reagents](#)

Entrez Gene:

Specificity

Mouse anti Human transcriptional regulator ERG antibody, clone OTI5D10

recognizes transcriptional regulator ERG, also known as ets-related or ETS transcription factor.

ERG encodes a member of the erythroblast transformation-specific (ETS) family of transcription factors. All members of this family are key regulators of embryonic development, cell proliferation, differentiation, angiogenesis, inflammation, and apoptosis. The protein encoded by ERG is mainly expressed in the nucleus. It contains an ETS DNA-binding domain and a PNT (pointed) domain which is implicated in the self-association of chimeric oncoproteins. This protein is required for platelet adhesion to the subendothelium, inducing vascular cell remodeling. It also regulates hematopoiesis, and the differentiation and maturation of megakaryocytic cells. ERG is involved in chromosomal translocations, resulting in different fusion gene products, such as TMPSSR2-ERG and NDRG1-ERG in prostate cancer, EWS-ERG in Ewing's sarcoma and FUS-ERG in acute myeloid leukemia. Multiple alternatively spliced transcript variants encoding different isoforms have been identified (provided by RefSeq, Jan 2012).

Mouse anti Human transcriptional regulator ERG antibody, clone OTI5D10 detects a band of 54 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Mouse anti transcriptional regulator ERG antibody detects a band of approximately 54 kDa in MOLT-4 cell lysates

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles

Guarantee

12 months from date of despatch

Acknowledgements

PrecisionAb is a trademark of Bio-Rad Laboratories.
