

Datasheet: VMA00696KT

Description:	TRAF5 ANTIBODY WITH CONTROL LYSATE
Specificity:	TRAF5
Format:	Purified
Product Type:	PrecisionAb™ Monoclonal
Isotype:	lgG1
Quantity:	2 Westerns

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	•			1/1000

PrecisionAb antibodies have been extensively <u>validated for the western blot application.</u> The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species Human Species Cross Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species. Product Form Purified IgG - Liquid Preparation 20μl Mouse monoclonal antibody affinity purified on Protein G from tissue culture supernatar Buffer Solution Phosphate buffered saline Preservative 0.09% Sodium Azide 1% Bovine Serum Albumin Immunogen Recombinant protein of partial human TRAF5 (amino acid 42-236) External Database Links UniProt:

Specificity	Mouse anti Human TRAF5 antibody recognizes the TNF receptor-associated factor 5, also know as RING finger protein 84.
	The scaffold protein encoded by TRAF5 is a member of the tumor necrosis factor receptor-associated factor (TRAF) protein family and contains a meprin and TRAF homology (MATH) domain, a RING-type zinc finger, and two TRAF-type zinc fingers. TRAF proteins are associated with, and mediate signal transduction from members of the TNF receptor superfamily. This protein is one of the components of a multiple protein complex which binds to tumor necrosis factor (TNF) receptor cytoplasmic domains and mediates TNF-induced activation. Alternate transcriptional splice variants have been characterized (provided by RefSeq, Jul 2008).
	Rabbit anti Human TRAF5 antibody detects a band of 64 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
Western Blotting	Mouse anti TRAF5 detects a band of approximately 64 kDa in Jurkat cell lysates
Instructions For Use	Please refer to the <u>PrecisionAb western blotting protocol.</u> For additional information on secondary antibody dilution and exposure time see product web page.
Lysate Composition	400μg Jurkat lysate lyophilized in RIPA buffer
Lysate Reconstitution	- If using DDT reconstitute the lyophilized lysate with 190μl DI H ₂ O, add 200μl 2x Laemmli Sample Buffer and 10μl 2M DTT If using BME reconstitute the lyophilized lysate with 180μl DI H ₂ O, add 200μl 2x Laemmli Sample Buffer and 20μl BME. Heat at 95°C for 5 minutes. For 10 well mini gels load 25μl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.
Storage	Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
	Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.
Guarantee	As supplied, 12 months from date of despatch
