

Datasheet: VMA00751

BATCH NUMBER 180704

Description:	MOUSE ANTI EGF RECEPTOR (pTyr1148)
Specificity:	EGF R (pTyr1148)
Other names:	ERBB, ERBB1, HER1
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Isotype:	IgG3
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - Liquid
Preparation	Mouse monoclonal antibody purified by ultrafiltration and size exclusion chromatography from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative	0.09% Sodium Azide
Stabilisers	PEG & Sucrose
Immunogen	Phosphopeptide conjugated to hemocyanin

Synonyms

ERBB1

Specificity

Mouse anti EGF receptor antibody recognizes the epidermal growth factor receptor, also known as proto-oncogene c-ErbB-1 or receptor tyrosine-protein kinase erbB-1, when phosphorylated at threonine 1148. EGF R plays a role in numerous cellular processes such as cell proliferation and apoptosis through the activation of downstream signaling pathways ([Scaltriti and Baselga 2006](#)). EGF R is autophosphorylated at tyrosine 1148 upon ligand binding ([Downward et al. 1985](#)). Phosphorylation at 1148 serves as a docking site for the adaptor protein Shc (Okutani *et al.* 1994). Binding of Shc to EGF R regulates association of the Grb2-Sos complex and is important for Ras signaling pathway activation ([Sakaguchi et al. 1998](#)).

Western Blotting

Mouse anti EGF receptor (pTyr1148) detects a band of approximately 175 kDa in pervanadate-treated A431 (treated lysate) cell lysates

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles

Guarantee

12 months from date of despatch

Acknowledgements

PrecisionAb is a trademark of Bio-Rad Laboratories.
