

Datasheet: VMA00755 BATCH NUMBER 180704

Description:	MOUSE ANTI STAT3 (pSer727)
Specificity:	STAT3 (pSer727)
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	23G5
Isotype:	lgG1
Quantity:	100 μΙ

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	-			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click here to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human	
Product Form	Purified IgG - Liquid	
Preparation	Mouse monoclonal antibody purified by thiophillic adsorption chromatography from tissue culture supernatant	and size exclusion
Buffer Solution	Phosphate buffered saline	
Preservative Stabilisers	0.09% Sodium Azide PEG & Sucrose	
Approx. Protein Concentrations	IgG concentration 0.5 mg/ml	

Immunogen	Phosphopeptide conjugated to KLH
External Database Links	UniProt: P40763 Related reagents Entrez Gene: 6774 STAT3 Related reagents
Synonyms	APRF
Specificity	Mouse anti STAT3 antibody recognizes signal transducer and activator of transcription 3, also known as DNA-binding protein APRF, acute-phase response factor and signal transducer and activator of transcription 3, when phosphorylated at serine 727. STAT3 is a member of the STAT family of transcription factors, which play a key role in numerous processes including cell differentiation, proliferation and transformation. Serine 727 is a key STAT3 phosphorylation site. Ser727 is phosphorylated by multiple kinases including mitogen-activated kinases (MAPK), mammalian target of rapamycin kinase (mTOR), cyclin-dependent kinase 5 (CDK5) and nemo-like kinase (Wakahara et al. 2012). There is an ongoing debate in the scientific literature around the impact of the phosphorylation at serine 727 (Wakahara et al. 2012). Some reports indicate that the transcriptional activity of STAT3 coincides with phosphorylation at serine 727 (Yokogami et al. 2000). Other reports show STAT3 activation independent of serine 727 (Wakahara et al. 2012). The role of serine 727 is likely dependent on the larger cellular context.
Western Blotting	Mouse anti STAT3 (pSer727) detects a band of approximately 84 kDa in HepG2 + EGF (treated lysate) cell lysates
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles
Guarantee	12 months from date of despatch
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.
Health And Safety Information	Material Safety Datasheet documentation #20403 available at: https://www.bio-rad-antibodies.com/SDS/VMA00755 Antibody (20403)
Regulatory	For research purposes only
