

## Datasheet: VMA00801

<b>Description:</b>	MOUSE ANTI WWOX
<b>Specificity:</b>	WWOX
<b>Format:</b>	Purified
<b>Product Type:</b>	PrecisionAb Monoclonal
<b>Clone:</b>	CD03/3H9
<b>Isotype:</b>	IgG1
<b>Quantity:</b>	100 µl

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

**The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range.** Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

<b>Target Species</b>	Human
<b>Product Form</b>	Purified IgG - Liquid
<b>Preparation</b>	Mouse monoclonal antibody affinity purified on Protein G from tissue culture supernatant
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide
<b>Approx. Protein Concentrations</b>	IgG concentration 1.0 mg/ml
<b>Immunogen</b>	<i>E. coli</i> -derived recombinant protein of amino acids 1-414 of human WWOX

---

**Synonyms**

FOR, WOX1

---

**Fusion Partners**

Spleen cells from immunised BALB/c mice were fused with cells of the mouse SP2/0 myeloma cell line

---

**Specificity**

**Mouse anti WWOX antibody** recognizes WW domain-containing oxidoreductase, also known as FOR, SDR41C1, and WOX1.

WWOX is an adaptor protein with significant roles in physiology and homeostasis. WWOX contributes to repair of double strand breaks in DNA by non-homologous end-joining (NHEJ) (Schrock et al. 2017). Deregulation of WWOX can lead to several severe pathological states. In particular, WWOX is relevant to neurodegeneration. Homozygous null mutation of WWOX leads to a range of neural diseases, metabolic disorders and death in newborn humans. The gene is also often downregulated in Alzheimer's disease (Teng et al. 2018). WWOX functions as a tumor suppressor, loss of WWOX has been found in various tumors including breast, colon, esophageal, gastric, lung, ovarian, and prostate cancers (Tanna and Aqeilan 2018). WWOX is also involved with resistance of cancer cells to radiation and cisplatin. Deficiency of WWOX has been associated with shorter overall survival times in cancer patients treated with radiation (Schrock et al. 2017).

---

**Western Blotting**

Mouse anti WWOX antibody detects a band of approximately 41 kDa in HEK293 cell lysates

---

**Storage**

Store undiluted at -20°C, avoiding repeated freeze thaw cycles

---

**Guarantee**

12 months from date of despatch

---

**Acknowledgements**

PrecisionAb is a trademark of Bio-Rad Laboratories
