

Datasheet: VMA00907

BATCH NUMBER 100005037

Description:	MOUSE ANTI CD148
Specificity:	CD148
Format:	Purified
Product Type:	PrecisionAb Monoclonal
Clone:	D02/2F7
Isotype:	IgG1
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Mouse monoclonal antibody purified by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	<i>E. coli</i> -derived recombinant protein, aa 36-541 of human CD148

External Database Links	UniProt: Q12913 Related reagents Entrez Gene: 5795 PTPRJ Related reagents
Synonyms	DEP1
Specificity	<p>Mouse anti CD148 antibody recognizes receptor-type tyrosine-protein phosphatase eta (RPTP), also known as PTPRJ and DEP1.</p> <p>CD148 is a transmembrane protein tyrosine phosphatase, a group of proteins important for regulating cell signaling pathways. CD148 expression is found on a wide range of cell types, including epithelial cells, endothelial cells, and hematopoietic cell populations. CD148 appears to function in suppression of growth factor signals, inhibiting cell growth and transformation (Takahashi et al. 2016). More specifically, CD148 may dephosphorylate proteins important for tumor growth or survival, including ERK1/2 and VEGFR. Tumor-suppressive roles of CD148 have been identified in colon, breast, and thyroid cancers. In contrast, CD148 may promote metastasis in other cancers including breast cancer and glioma cells. In gastric cancer, suppression of CD148 may be an indicator of poor outcomes, suggesting its use as a prognostic marker and therapeutic target (Sun et al. 2020).</p>
Western Blotting	Mouse anti CD148 antibody detects a band of approximately 250 kDa in HeLa cell lysates
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles
Guarantee	As supplied, 12 months from date of despatch
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/VMA00907 10040
Regulatory	For research purposes only
