

Datasheet: VPA00031

Description:	GOAT ANTI GNB2L1
Specificity:	GNB2L1
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse, Rat N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.
Product Form	Purified IgG - liquid
Preparation	Goat polyclonal antibody by purified ammonium sulfate precipitation followed by antigen affinity chromatography.
Buffer Solution	TRIS buffered saline.
Preservative Stabilisers	0.02% Sodium Azide (NaN ₃) 0.5% Bovine Serum Albumin
Immunogen	Peptide sequence C-NTLVCKYTVQDESH from an internal region of GNB2L1

Specificity

Goat anti Human GNB2L1 antibody recognizes human guanine nucleotide-binding protein subunit beta-2-like 1 (GNB2L1), also known as cell proliferation-inducing gene 21 protein, human lung cancer oncogene 7 protein, receptor for activated C kinase or RACK1. GNB2L1 is a 317 amino acid member of the WD repeat G protein beta family, containing two [WD](#) repeats. GNB2L1 acts as a substrate for Src protein-tyrosine kinase ([Chang et al. 2002](#)) and as a regulator of signaling pathways ([Sato et al. 2014](#), [Long et al. 2014](#)).

Goat anti Human GNB2L1 antibody recognizes human GNB2L1 as a band of ~35 kDa in multiple human cell lysates by western blotting under reducing conditions. The antibody also cross-reacts with rodent cell line lysates tested.

Western Blotting

Anti GNB2L1 antibody detects a band of approximately 35 kDa in HEK293 cell lysates.

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee

12 months from date of despatch.

Acknowledgements

PrecisionAb is a trademark of Bio-Rad Laboratories.

Health And Safety Information

Material Safety Datasheet documentation #10058 available at: <https://www.bio-rad-antibodies.com/SDS/VPA00031>
