

Datasheet: VPA00066

Description:	GOAT ANTI IRF5
Specificity:	IRF5
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse, Rat N.B. Antibody reactivity and working conditions may vary between species.
Product Form	Purified IgG - liquid
Preparation	Goat polyclonal antibody purified by affinity chromatography
Buffer Solution	TRIS buffered saline
Preservative Stabilisers	0.02% Sodium Azide (NaN ₃) 0.5% Bovine Serum Albumin
Immunogen	Synthetic peptide sequence C-QGPWPMHPAGMQ from the C terminal region of IRF5.

Specificity **Goat anti Human IRF5 antibody** recognizes interferon regulatory factor 5, a transcription factor

belonging to the interferon regulatory factor. IRFs contain a conserved N-terminal region which recognizes the interferon consensus sequence in the promoter region on interferon genes. Studies suggest that IRF5 plays a role in M1 macrophage polarization ([Krausgruber et al., 2011](#)).

Goat anti human IRF5 antibody detects IRF5 as a single band of 60 kDa in a wide range of human cell line lysates. Cross reactivity with rodent cell lines is also observed.

Western Blotting Goat anti IRF5 detects a band of approximately 60 kDa in K562 cell lysates.

Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee 12 months from date of despatch
