Synonyms	MRP4
Specificity	Goat anti Human ABCC4 antibody recognizes ABCC4 a 200 kDa protein and a member of the MRP family of transporters.
	The ABCC4 protein shows a broad pattern of expression having been detected in the kidneys, liver, erythrocytes, adrenal glands, platelets, brain, and pancreas. ABCC4 is present in the apical membrane as well as in the basolateral membrane and is capable of transporting a broad number of substrates, including bile salt conjugates, conjugated steroids, cyclic nucleotides, nucleoside analogs, eicosanoids, and cardiovascular drugs. Although ABCC4 is present in many human drug-resistant cancer cell lines, it remains to be determined if ABCC4 is associated with resistance to drugs in solid tumors (Borst et al. 2007).
	Goat anti Human ABCC4 antibody detects ABCC4 as a band of 200 kDa in a range of human cell line lysates.
Western Blotting	Goat anti ABCC4 detects a band of approximately 200 kDa in K562 cell lysates.
