

Datasheet: VPA00077

Description:	RABBIT ANTI ANNEXIN V
Specificity:	ANNEXIN V
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunoprecipitation	▪			
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse, Rat N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.
Product Form	Purified IgG - liquid
Preparation	Rabbit polyclonal antibody purified by affinity chromatography.
Buffer Solution	Phosphate buffered saline.
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃).
Approx. Protein	IgG concentration 0.5 mg/ml.

Concentrations

Immunogen Human ANXA5 full-length recombinant protein 6x His tagged.

Synonyms ANX5, ENX2, PP4

Specificity

Rabbit anti Human annexin V antibody recognizes human annexin V (ANXA5), a member of the annexin family of membrane binding proteins that share structural properties and biological activities associated with membrane related processes. Annexin V, also known as placental anticoagulant protein 4, has potent anticoagulant properties and is amongst the annexins that have extracellular presence in addition to intracellular localization.

The annexin V protein binds with high affinity to membranes bearing phosphatidylserine (PS) and fluorescently labeled annexin V is commonly used as a marker for apoptotic cells *in vitro* and *in vivo*.

Rabbit anti Human annexin V antibody detects ANXA5 as a single band of 32 kDa in a range of human cell line lysates. Cross reactivity with rodent cell lines is also observed.

Western Blotting Rabbit anti annexin V detects a band of approximately 32 kDa in HeLa cell lysates.

Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee 12 months from date of despatch.
