

Datasheet: VPA00115

BATCH NUMBER 161214

Description:	GOAT ANTI CATENIN GAMMA
Specificity:	CATENIN GAMMA
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Goat polyclonal antibody purified by affinity chromatography.
Buffer Solution	TRIS buffered saline
Preservative Stabilisers	0.02% Sodium Azide (NaN ₃) 0.5 % BSA
Immunogen	Peptide with the sequence C-GLRPPYPTADHMLA, from the C Terminus of the protein sequence.
External Database Links	UniProt: P14923 Related reagents

Entrez Gene:[3728](#) JUP [Related reagents](#)

Synonyms	CTNNG, DP3
-----------------	------------

Specificity	<p>Mouse anti Human catenin gamma antibody recognizes catenin gamma, also known as the junction plakoglobin, desmoplakin III or desmoplakin-3.</p> <p>Catenin gamma, encoded by the JUP gene, is a major cytoplasmic protein which is the only known constituent common to submembranous plaques of both desmosomes and intermediate junctions. This protein forms distinct complexes with cadherins and desmosomal cadherins and is a member of the catenin family since it contains a distinct repeating amino acid motif called the armadillo repeat. Mutation in JUP has been associated with Naxos disease. Alternative splicing occurs in JUP; however, not all transcripts have been fully described (provided by RefSeq, Jul 2008).</p> <p>Mouse anti Human catenin gamma antibody detects a band of 82 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
--------------------	--

Western Blotting	Anti catenin gamma detects a band of approximately 82 kDa in A431 cell lysates.
-------------------------	---

Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
----------------	---

Guarantee	12 months from date of despatch
------------------	---------------------------------

Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.
-------------------------	---

Health And Safety Information	Material Safety Datasheet documentation #10058 available at: https://www.bio-rad-antibodies.com/SDS/VPA00115 Antibody (10058)
--------------------------------------	--

Regulatory	For research purposes only
-------------------	----------------------------
