

Datasheet: VPA00119

BATCH NUMBER 091214

Description:	GOAT ANTI LAMIN B1
Specificity:	LAMIN B1
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	■			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Goat polyclonal antibody purified by affinity chromatography.
Buffer Solution	TRIS buffered saline
Preservative Stabilisers	0.02% Sodium Azide (NaN ₃) 0.5 % BSA
Immunogen	Peptide with the sequence C-DVKVILKNSQGE, from the internal region of the protein sequence.
External Database Links	UniProt: P20700 Related reagents

Entrez Gene:[4001](#) LMNB1 [Related reagents](#)**Synonyms**

LMN2, LMNB

Specificity**Goat anti Human lamin B1 antibody** recognizes the lamin B1 protein

The nuclear lamina consists of a two-dimensional matrix of proteins located next to the inner nuclear membrane. The lamin family of proteins make up the matrix and are highly conserved in evolution. During mitosis, the lamina matrix is reversibly disassembled as the lamin proteins are phosphorylated. Lamin proteins are thought to be involved in nuclear stability, chromatin structure and gene expression. Vertebrate lamins consist of two types, A and B. Encoded by LMNB1, lamin B1 represents one of the two B type proteins. Alternative splicing results in transcript variants and a duplication of LMNB1 is associated with autosomal dominant adult-onset leukodystrophy (ADLD) (provided by RefSeq, Oct 2010).

The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Anti lamin B1 detects a band of approximately 74 kDa in HEK293 cell lysates.

Storage

Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee

12 months from date of despatch

Acknowledgements

PrecisionAb is a trademark of Bio-Rad Laboratories.

Health And Safety Information
