

Datasheet: VPA00123

Description:	GOAT ANTI CCT ALPHA
Specificity:	CCT ALPHA
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Goat polyclonal antibody purified by affinity chromatography.
Buffer Solution	TRIS buffered saline.
Preservative Stabilisers	0.02% Sodium Azide (NaN ₃) 0.5 % BSA
Immunogen	Peptide with the sequence C-SYEDAVHSGALND, from the C Terminus of the protein sequence.

Entrez Gene:

Synonyms	CCT1, CCTA
-----------------	------------

Specificity	<p>Goat anti Human CCT alpha antibody recognizes the CCT alpha protein, also known as T-complex protein 1 subunit alpha (TCP-1-alpha).</p> <p>CCT alpha, encoded by the TCP1 gene, is a molecular chaperone that is a member of the chaperonin containing TCP1 complex (CCT), also known as the TCP1 ring complex (TRiC). This complex consists of two identical stacked rings, each containing eight different proteins. Unfolded polypeptides enter the central cavity of the complex and are folded in an ATP-dependent manner. The complex folds various proteins, including actin and tubulin. Alternate transcriptional splice variants of TCP1, encoding different isoforms, have been characterized. In addition, three pseudogenes that appear to be derived from TCP1 have been found (provided by RefSeq, Jun 2010).</p> <p>Goat anti Human CCT alpha antibody detects a band of 60 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
--------------------	---

Western Blotting	Anti CCT alpha detects a band of approximately 60 kDa in K562 cell lysates.
-------------------------	---
