

Datasheet: VPA00196

BATCH NUMBER 060815

Description:	RABBIT ANTI GLI2
Specificity:	GLI2
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Rabbit polyclonal antibody purified by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin
Immunogen	Synthetic peptide corresponding to amino acids 46-60 of human GLI2 (isoform a)
External Database Links	UniProt: P10070 Related reagents

Entrez Gene:

[2736](#) [GLI2](#) [Related reagents](#)

Synonyms	THP
-----------------	-----

Specificity	<p>Rabbit anti Human GLI2 antibody recognizes GLI2, also known as GLI family zinc finger protein 2, GLI-Kruppel family member GLI2, glioma-associated oncogene family zinc finger 2, oncogene GLI2, tax helper protein 1, tax helper protein 2, tax-responsive element-2 holding protein, tax-responsive element-25-bp sequence binding protein and zinc finger protein GLI2.</p> <p>The GLI2 gene encodes a protein which belongs to the C2H2-type zinc finger protein subclass of the Gli family. Members of this subclass are characterized as transcription factors which bind DNA through zinc finger motifs. These motifs contain conserved H-C links. Gli family zinc finger proteins are mediators of Sonic hedgehog (Shh) signaling and they are implicated as potent oncogenes in the embryonal carcinoma cell. The protein encoded by GLI2 localizes to the cytoplasm and activates patched Drosophila homolog (PTCH) gene expression. It is also thought to play a role during embryogenesis. The encoded protein is associated with several phenotypes- Greig cephalopolysyndactyly syndrome, Pallister-Hall syndrome, preaxial polydactyly type IV, postaxial polydactyly types A1 and B (provided by RefSeq, Jul 2008).</p> <p>Rabbit anti Human GLI2 antibody detects a band of 191 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
--------------------	--

Western Blotting	Anti GLI2 detects a band of approximately 191 kDa in HeLa cell lysates.
-------------------------	---

Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
----------------	---

Guarantee	12 months from date of despatch
------------------	---------------------------------

Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories.
-------------------------	---

Health And Safety Information	Material Safety Datasheet documentation #10041 available at: https://www.bio-rad-antibodies.com/SDS/VPA00196 Antibody (10041)
--------------------------------------	--

Regulatory	For research purposes only
-------------------	----------------------------
