

Datasheet: VPA00229KT

Description:	THYMOPOETIN ANTIBODY WITH CONTROL LYSATE
Specificity:	THYMOPOETIN
Format:	Purified
Product Type:	PrecisionAb™ Polyclonal
Isotype:	Polyclonal IgG
Quantity:	2 Westerns

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

PrecisionAb antibodies have been extensively [validated for the western blot application](#). The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species.
Product Form	Purified IgG - liquid
Preparation	20µl Rabbit polyclonal antibody purified by affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Immunogen	KLH conjugated synthetic peptide between 243-269 amino acids from the central region of human thymopoetin
External Database Links	<p>UniProt: P42167 Related reagents</p> <p>Entrez Gene: 7112 TMPO Related reagents</p>
Synonyms	LAP2

Specificity	<p>Rabbit anti Human thymopoietin antibody recognizes the beta isoform of thymopoietin, also known as lamina-associated polypeptide 2, isoform beta, TP beta and thymopoietin-related peptide isoform beta.</p> <p>Encoded by the TMPO gene, thymopoietins reside in the nucleus and may play a role in the assembly of the nuclear lamina, helping to maintain the structural organization of the nuclear envelope. Mutations in TMPO are associated with dilated cardiomyopathy and this gene has been found up regulated in several types of cancer. Alternatively spliced transcript variants encoding different isoforms have been noted for TMPO (provided by RefSeq, May 2010).</p> <p>Rabbit anti Human thymopoietin antibody detects a band of 51 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
Western Blotting	Anti thymopoetin detects a band of approximately 51 kDa in HEK293 cell lysates
Instructions For Use	Please refer to the PrecisionAb western blotting protocol . For additional information on secondary antibody dilution and exposure time see product web page.
Lysate Composition	400µg HEK293 lysate lyophilized in RIPA buffer.
Lysate Reconstitution	<p>- If using DDT reconstitute the lyophilized lysate with 190µl DI H₂O, add 200µl 2x Laemmli Sample Buffer and 10µl 2M DTT.</p> <p>- If using BME reconstitute the lyophilized lysate with 180µl DI H₂O, add 200µl 2x Laemmli Sample Buffer and 20µl BME.</p> <p>Heat at 95°C for 5 minutes. For 10 well mini gels load 25µl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.</p>
Storage	<p>Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.</p> <p>Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.</p>
Guarantee	As supplied, 12 months from date of despatch.
Acknowledgements	PrecisionAb™ is a trademark of Bio-Rad Laboratories.
