## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](http://www.bio-rad-antibodies.com/products) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

### Target Species

Human

### Product Form

Purified IgG - liquid

### Preparation

Rabbit polyclonal antibody purified by affinity chromatography

### Buffer Solution

Phosphate buffered saline

### Preservative Stabilisers

0.09% Sodium Azide (NaN₃)

### Immunogen

KLH conjugated synthetic peptide between 262-316 amino acids from the C-terminal region of human SOX2

### Entrez Gene

### Specificity

Rabbit anti Human SOX2 antibody recognizes the transcription factor SOX2, also known as SRY-related HMG-box gene 2.
This intronless gene encodes a member of the SRY-related HMG-box (SOX) family of transcription factors involved in the regulation of embryonic development and in the determination of cell fate. SOX2 is required for stem-cell maintenance in the central nervous system, and also regulates gene expression in the stomach. Mutations in the SOX2 gene have been associated with optic nerve hypoplasia and with syndromic microphthalmia, a severe form of structural eye malformation. SOX2 lies within an intron of another gene called SOX2 overlapping transcript (SOX2OT) (provided by RefSeq, Jul 2008).

Rabbit anti Human SOX2 antibody detects a band of 35 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
