

Datasheet: VPA00243

Description:	RABBIT ANTI FUSE-BINDING PROTEIN 1
Specificity:	FUSE-BINDING PROTEIN 1
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	■			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species.
Product Form	Purified IgG - liquid
Preparation	Rabbit polyclonal antibody purified by affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Immunogen	KLH conjugated synthetic peptide between 240-268 amino acids from the central region of human FUSE-binding protein 1
External Database Links	<p>UniProt: Q96AE4 Related reagents</p> <p>Entrez Gene: 8880 FUBP1 Related reagents</p>

Specificity Rabbit anti Human FUSE-binding protein 1 antibody recognizes the far upstream element (FUSE)-binding protein 1, also known as DNA helicase V and hDH V.

Encoded by the FUBP1 gene, FUSE-binding protein 1 is a ssDNA binding protein that activates the far upstream element (FUSE) of c-myc and stimulates expression of c-myc in undifferentiated cells. Regulation of FUSE by FUBP occurs through single-strand binding of FUBP to the non-coding strand. This protein has been shown to function as an ATP-dependent DNA helicase (provided by RefSeq, Jul 2008).

Rabbit anti Human FUSE-binding protein 1 antibody detects a band of 77 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting Anti FUSE-binding protein 1 detects a band of approximately 77 kDa in HepG2 cell lysates

Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee As supplied, 12 months from date of despatch.
