

Datasheet: VPA00262KT

Description:	CATENIN DELTA 1 ANTIBODY WITH CONTROL LYSATE
Specificity:	CATENIN DELTA 1
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	2 Westerns

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting				1/1000

PrecisionAb antibodies have been extensively <u>validated for the western blot</u> <u>application.</u> The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	20μl Rabbit polyclonal antibody purified by affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% sodium azide (NaN ₃), 1% bovine serum albumin.
Immunogen	KLH-conjugated synthetic peptide corresponding to aa 160-200 of human catenin delta 1
External Database Links	UniProt: O60716 Related reagents

Entrez Gene:

1500 CTNND1 Related reagents

Synonyms	KIAA0384
Specificity	Rabbit anti Human catenin delta 1 antibody recognizes catenin delta-1, also known as CTNND1, CAS, CTNND, cadherin-associated Src substrate, p120 and p120 catenin.
	Catenin delta 1 is a member of the Armadillo protein family. This family of proteins functions in adhesion between cells and signal transduction. Multiple translation initiation codons and alternative splicing result in many different isoforms being translated, some with undetermined function. Read-through transcription also exists between catenin delta 1 and the neighboring upstream thioredoxin-related transmembrane protein 2 (TMX2) gene (provided by RefSeq, Dec 2010).
	Rabbit anti Human catenin delta-1 antibody detects a band of 100 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
Western Blotting	Anti catenin delta 1 detects a band of approximately 100 kDa in A431 cell lysate
Instructions For Use	Please refer to the <u>PrecisionAb western blotting protocol.</u> For additional information on secondary antibody dilution and exposure time see product web page.
Lysate Composition	400μg A431 lysate lyophilized in RIPA buffer
Lysate Reconstitution	- If using DDT reconstitute the lyophilized lysate with 190μl DI H ₂ O, add 200μl 2x Laemmli Sample Buffer and 10μl 2M DTT If using BME reconstitute the lyophilized lysate with 180μl DI H ₂ O, add 200μl 2x Laemmli Sample Buffer and 20μl BME. Heat at 95°C for 5 minutes. For 10 well mini gels load 25μl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.
Storage	Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.
	Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.
Guarantee	As supplied, 12 months from date of despatch
Acknowledgements	PrecisionAb™ is a trademark of Bio-Rad Laboratories
