

Datasheet: VPA00323

| Description: | scription: RABBIT ANTI NXF1 | |
|---------------|-----------------------------|--|
| Specificity: | NXF1 | |
| Format: | Purified | |
| Product Type: | PrecisionAb Polyclonal | |
| Isotype: | Polyclonal IgG | |
| Quantity: | 100 μΙ | |
| | | |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|------------------|-----|----|----------------|--------------------|
| Western Blotting | • | | | 1/1000 |

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click here to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

| Target Species | Human |
|-----------------------------|--|
| Product Form | Purified IgG - liquid |
| Preparation | Rabbit polyclonal antibody purified by affinity chromatography. |
| Buffer Solution | Phosphate buffered saline. |
| Preservative Stabilisers | 0.09% Sodium Azide (NaN ₃). |
| Immunogen | KLH-conjugated synthetic peptide corresponding to aa 1-30 of human NXF1 |
| External Database Links | UniProt: Q9UBU9 Related reagents Entrez Gene: 10482 NXF1 Related reagents |

| Synonyms | TAP |
|----------------------------------|--|
| Specificity | Rabbit anti Human NXF1 antibody recognizes NFX1, also known as mRNA export factor TAP and tip-associated protein. |
| | The NXF1 gene is one member of a family of nuclear RNA export factor genes. Common domain features of this family include a non-canonical RNP-type RNA-binding domain (RBD), 4 leucine-rich repeats (LRRs), a nuclear transport factor 2 (NTF2)-like domain that allows hetero-dimerization with NTF2-related export protein-1 (NXT1), and a ubiquitin-associated domain that mediates interactions with nucleo-porins. The LRRs and NTF2-like domains are required for export activity. Alternative splicing seems to be a common mechanism in NXF1 family. The encoded protein of NXF1 shuttles between the nucleus and the cytoplasm and binds in vivo to poly(A)+ RNA. It is the vertebrate homologue of the yeast protein Mex67p. The encoded protein overcomes the mRNA export block caused by the presence of saturating amounts of CTE (constitutive transport element) RNA of type D retroviruses. Alternative splicing results in multiple transcript variants (provided by RefSeq, Jul 2008). |
| | Rabbit anti Human NXF1 antibody detects a band of 70 kDa. The antibody has been extensively validated for western blotting using whole cell lysates. |
| Western Blotting | Anti NXF1 detects a band of approximately 70 kDa in Jurkat cell lysate. |
| Storage | Store undiluted at -20°C, avoiding repeated freeze thaw cycles. |
| Guarantee | 12 months from date of despatch. |
| Acknowledgements | PrecisionAb is a trademark of Bio-Rad Laboratories. |
| Health And Safety Information | Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/VPA00323 Antibody (10040) |
| Regulatory | For research purposes only. |
