

Datasheet: VPA00363

Description:	RABBIT ANTI RPL17
Specificity:	RPL17
Format:	Purified
Product Type:	PrecisionAb™ Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

PrecisionAb antibodies have been extensively [validated for the western blot application](#). The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species.
Product Form	Purified IgG - liquid
Preparation	Rabbit polyclonal antibody purified by affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative	0.09% Sodium Azide (NaN ₃)
Stabilisers	1% Bovine Serum Albumin
Immunogen	KLH-conjugated synthetic peptide corresponding to aa 156-184 of human RPL17
External Database Links	<p>UniProt: P18621 Related reagents</p> <p>Entrez Gene: 6139 RPL17 Related reagents</p>

Specificity **Rabbit anti Human RPL17 antibody** recognizes RPL17, also known as 60S ribosomal protein L17, 60S ribosomal protein L23 or gene encoding putative NFκB activating protein.

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. The RPL17 gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L22P family of ribosomal proteins. It is located in the cytoplasm. RPL17 has been referred to as rpl23 because the encoded protein shares amino acid identity with ribosomal protein L23 from *Halobacterium marismortui*; however, its official symbol is RPL17. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of RPL17 dispersed through the genome. Alternative splicing results in multiple transcript variants. Read-through transcription also exists between RPL17 and the neighboring downstream C18orf32 (chromosome 18 open reading frame 32) gene (provided by RefSeq, Dec 2010).

Rabbit anti Human RPL17 antibody detects bands of 22 and 24 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting	Anti RPL17 detects a bands of approximately 22 and 24 kDa in HeLa cell lysate
Instructions For Use	Please refer to the PrecisionAb western blotting protocol . For additional information on secondary antibody dilution and exposure time see product web page.
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles
Shelf Life	As supplied, 12 months from date of despatch
Acknowledgements	PrecisionAb™ is a trademark of Bio-Rad Laboratories
Health And Safety Information	Material Safety Datasheet documentation #10041 available at: Antibody (10041): https://www.bio-rad-antibodies.com/uploads/MSDS/10041.pdf
Regulatory	For research purposes only
