Datasheet: VPA00388 BATCH NUMBER 160309

Description:	RABBIT ANTI HBS1L
Specificity:	HBS1L
Format:	Purified
Product Type:	PrecisionAb Polyclonal
lsotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u>

Target Species	Human						
Species Cross Reactivity	Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.						
Product Form	Purified IgG - liquid						
Preparation	Rabbit polyclonal antib	ody purified	d by affinit	ty chromatography			
Buffer Solution	Phosphate buffered sa	line					
Preservative Stabilisers	0.09% Sodium Azide (I	NaN ₃)					

External Database						
Links	UniProt: <u>Q9Y450</u> <u>Related reagents</u> Entrop Conc.					
	Entrez Gene: <u>10767</u> HBS1L <u>Related reagents</u>					
Synonyms	HBS1, KIAA1038					
Specificity	Rabbit anti Human HBS1L antibody recognizes HBS1L, also known as ERF3-similar protein, Hsp70 subfamily B suppressor 1-like protein and eRF3 family member.					
	The HBS1L gene encodes a member of the GTP-binding elongation factor family. It is expressed in multiple tissues with the highest expression in heart and skeletal muscle. The inter-genic region of HBS1L and the MYB gene has been identified to be a quantitative trait locus (QTL) controlling fetal hemoglobin level, and this region influences erythrocyte, platelet, and monocyte counts as well as erythrocyte volume and hemoglobic content. DNA polymorphisms at this region associate with fetal hemoglobin levels and pain crises in sickle cell disease. A single nucleotide polymorphism in exon 1 of HBS1L is significantly associated with severity in beta-thalassemia/Hemoglobin E. Multiple alternatively spliced transcript variants encoding different protein isoforms have been found for HBS1L (provided by RefSeq, May 2009).					
	Rabbit anti Human HBS1L antibody detects a band of 70 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.					
Western Blotting	Anti HBS1L detects a band of approximately 70 kDa in HEK293 cell lysate					
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles					
Guarantee	12 months from date of despatch					
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories					
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/VPA00388 10040					
Regulatory	For research purposes only
