

Datasheet: VPA00412

BATCH NUMBER 160427

Description:	RABBIT ANTI PSMC6
Specificity:	PSMC6
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 μΙ

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	•			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click here to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human		
Product Form	Purified IgG - liquid		
Preparation	Rabbit polyclonal antibody purified by affinity chromatography		
Buffer Solution	Phosphate buffered saline		
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 2% Sucrose		
Immunogen	Synthetic peptide corresponding to the C-terminal region of human PSMC6		
External Database Links	UniProt:		
	P62333 Related reagents		

Entrez Gene:

ATPase domain protein 44 and proteasome 26S subunit ATPase 6. The 26S proteasome is a multicatalytic proteinase complex with a highly ordered structure composed of 2 complexes, a 20S core and a 19S regulator. The 20S core is composed 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rin are composed of 7 beta subunits. The 19S regulator is composed of a base, which contains 6 ATPase subunits and 2 non-ATPase subunits, and a lid, which contains up to 10 non-ATPase subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome, the immune-proteasome, is the processing of class I MHC peptides. PSMC6 encodes one of the ATPase subunits, a member of the triple-A family of ATPases which have a chaperone-like activity. Pseudogenes have been identified on chromosomes 8 and 12 (provided by RefSeq, Jul 2008). Rabbit anti Human PSMC6 antibody detects a band of 50 kDa. The antibody has been extensively validated for western blotting using whole cell lysates. Western Blotting Anti PSMC6 detects a band of approximately 50 kDa in HEK293 cell lysate Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles Guarantee 12 months from date of despatch Acknowledgements Material Safety Datasheet documentation #10045 available at: https://www.bio-rad-antibodies.com/SDS/VPA00412 Antibody (10045)	Synonyms	SUG2
