

### Datasheet: VPA00571KT

Description:	SNAIL ANTIBODY WITH CONTROL LYSATE
Specificity:	SNAIL
Format:	Purified
Product Type:	PrecisionAb™ Polyclonal
Isotype:	Polyclonal IgG
Quantity:	2 Westerns

### **Product Details**

#### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="https://www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	•			1/1000

**PrecisionAb antibodies have been extensively <u>validated for the western blot application.</u> The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.** 

Target Species	Human	
Species Cross Reactivity	Reacts with: Mouse  N.B. Antibody reactivity and working conditions may vary between species.	
Product Form	Purified IgG - liquid	
Preparation	20μl Rabbit polyclonal antibody purified by affinity chromatography.	
Buffer Solution	Phosphate buffered saline.	
Preservative Stabilisers	0.09% Sodium Azide (NaN <sub>3</sub> ).	
Immunogen	KLH conjugated synthetic peptide corresponding to amino acid 1-30 of human SNAIL	
External Database Links	UniProt:  O95863 Related reagents  Entrez Gene:  6615 SNAI1 Related reagents	
Synonyms	SNAH	

Specificity	<b>Rabbit anti Human SNAIL antibody</b> recognizes SNAIL also known as zinc finger protein SNAI1, protein snail homolog 1, snail 1 homolog or snail 1 zinc finger protein.	
	The Drosophila embryonic protein snail is a zinc finger transcriptional repressor which downregulates the expression of ectodermal genes within the mesoderm. The nuclear protein encoded by SNAI1 is structurally similar to the Drosophila snail protein, and is also thought to be critical for mesoderm formation in the developing embryo. At least two variants of a similar processed pseudogene have been found on chromosome 2 (provided by RefSeq, Jul 2008).	
	Rabbit anti Human SNAIL antibody detects a band of 29 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.	
Western Blotting	Anti SNAIL detects a band of approximately 29 kDa in Jurkat cell lysates.	
Instructions For Use	Please refer to the PrecisionAb western blotting protocol.	
Lysate Composition	400μg Jurkat lysate lyophilized in RIPA buffer.	
Lysate Reconstitution	- If using DDT reconstitute the lyophilized lysate with 190 $\mu$ l DI H $_2$ O, add 200 $\mu$ l 2x Laemmli Sample Buffer and 10 $\mu$ l 2M DTT.	
	- If using BME reconstitute the lyophilized lysate with 180 $\mu$ l DI H $_2$ O, add 200 $\mu$ l 2x Laemmli Sample Buffer and 20 $\mu$ l BME.	
	Heat at 95°C for 5 minutes. For 10 well mini gels load 25µl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.	
Storage	Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.	
	Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.	
Guarantee	As supplied, 12 months from date of despatch.	
Acknowledgements	PrecisionAb™ is a trademark of Bio-Rad Laboratories.
