

Datasheet: VPA00574

Description:	RABBIT ANTI PTRF
Specificity:	PTRF
Format:	Semi Pure
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	■			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid.
Preparation	Rabbit Ig fraction prepared by ammonium sulphate precipitation.
Buffer Solution	Phosphate buffered saline.
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃).
Immunogen	KLH conjugated synthetic peptide corresponding to amino acid 1-30 of human PTRF
External Database Links	<p>UniProt:</p> <p>Q6NZI2 Related reagents</p> <p>Entrez Gene:</p>

Specificity **Rabbit anti Human PTRF antibody** recognizes PTRF also known as polymerase I and transcript release factor, TTF-I interacting peptide 12 or cavin-1.

The PTRF gene encodes a protein that enables the dissociation of paused ternary polymerase I transcription complexes from the 3' end of pre-rRNA transcripts. This protein regulates rRNA transcription by promoting the dissociation of transcription complexes and the reinitiation of polymerase I on nascent rRNA transcripts. This protein also localizes to caveolae at the plasma membrane and is thought to play a critical role in the formation of caveolae and the stabilization of caveolins. This protein translocates from caveolae to the cytoplasm after insulin stimulation. Caveolae contain truncated forms of this protein and may be the site of phosphorylation-dependent proteolysis. PTRF is also thought to modify lipid metabolism and insulin-regulated gene expression. Mutations in PTRF result in [CGL4](#), a disorder characterized by generalized lipodystrophy and muscular dystrophy ([Hayashi *et al.* 2009](#)) (provided by RefSeq, Nov 2009).

Rabbit anti Human PTRF antibody detects a band of 60 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting Anti PTRF detects a band of approximately 60 kDa in A549 cell lysates.

Storage Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Guarantee 12 months from date of despatch
