

# Datasheet: VPA00671KT

Description:	CLUSTERIN ANTIBODY WITH CONTROL LYSATE				
Specificity:	CLUSTERIN				
Format:	Purified				
Product Type:	PrecisionAb Polyclonal				
lsotype:	Polyclonal IgG				
Quantity:	2 Westerns				

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .

Synonyms	APOJ, CLI, KUB1					
Specificity	Rabbit anti Human clusterin antibody recognizes clusterin, also known as					
	apolipoprotein J, complement lysis inhibitor, ku70-binding protein 1, sulfated glycoprotein					
	2, or testosterone-repressed prostate message 2.					
	_,					
	The protein encoded by CLU gene is a secreted chaperone that can under some stress					
	conditions also be found in the cell cytosol. It has been suggested to be involved in					
	several basic biological events such as cell death, tumor progression, and					
	neurodegenerative disorders. Alternate splicing results in both coding and non-coding					
	variants (provided by RefSeq, May 2011).					
	Rabbit anti Human clusterin antibody detects a band of 65 kDa. The antibody has been					
	extensively validated for western blotting using whole cell lysates.					
	oxionology validated for weetern bletting doing whole consystated.					
Western Blotting	Rabbit anti clusterin detects a band of approximately 65 kDa in A549 cell lysates					
Instructions For Use	Please refer to the PrecisionAb western blotting protocol. For additional information on					
	secondary antibody dilution and exposure time see product web page.					
Lysate Composition	400ug 4540 lycate lyophilized in RIPA huffer					
Lysate Composition	400µg A549 lysate lyophilized in RIPA buffer.
