Datasheet: VPA00686 BATCH NUMBER 161118

Description:	RABBIT ANTI ALPHA ACTININ 4
Specificity:	ALPHA ACTININ 4
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications	This product has been reported to work in the following applications. This derived from testing within our laboratories, peer-reviewed publications of communications from the originators. Please refer to references indicated information. For general protocol recommendations, please visit <u>www.bio</u>

	Western Blotting	•	110	Not Determined	1/1000			
Target Species	criteria within Bio-Rac how we validate our P	d's ongoin PrecisionA nique this c	g antiboo b range. does not r	dy validation program Where this product hat necessarily exclude its	e defined performance nme. Click <u>here</u> to learn s not been tested for use in such procedures.			
Species Cross Reactivity	Reacts with: Mouse N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.							
Product Form	Purified IgG - liquid							
Preparation	Rabbit polyclonal antibo	ody purified	d by affinit	y chromatography				
Buffer Solution	TRIS buffered glycine							
Preservative Stabilisers	0.01% Thiomersal <50% Glycerol

Specificity	Rabbit anti Human alpha actinin 4 antibody recognizes alpha actinin 4, also known as actinin-4, ACTN4, FSGS or FSGS1.				
	Alpha actinins belong to the spectrin gene superfamily which represents a diverse group of cytoskeletal proteins. Alpha actinin is an actin-binding protein with multiple roles in different cell types. In nonmuscle cells, the cytoskeletal isoform is found along microfilament bundles and adherens-type junctions, where it is involved in binding actin to the membrane. ACTN4 gene encodes a non-muscle, alpha actinin isoform which is concentrated in the cytoplasm, and thought to be involved in metastatic processes. Mutations in ACTN4 gene have been associated with focal and segmental glomerulosclerosis (provided by RefSeq, Jul 2008).				
	Rabbit anti Human alpha actinin 4 antibody detects a band of 100 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.				
Western Blotting	Rabbit anti alpha actinin 4 detects a band of approximately 100 kDa in MCF7 cell lysates				
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles.				
Guarantee	12 months from date of despatch				
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories				
Health And Safety Information	Material Safety Datasheet documentation #20357 available at: https://www.bio-rad-antibodies.com/SDS/VPA00686 Antibody (20357)				
Regulatory	For research purposes only
