

Datasheet: VPA00766 **BATCH NUMBER 170515**

| Description: | RABBIT ANTI CHK2 | |
|---------------|------------------------|--|
| Specificity: | CHK2 | |
| Format: | Purified | |
| Product Type: | PrecisionAb Polyclonal | |
| Isotype: | Polyclonal IgG | |
| Quantity: | 100 μΙ | |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.biorad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|------------------|-----|----|----------------|--------------------|
| Western Blotting | | | | 1/1000 |

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click here to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

| External Database | UniProt: | |
|-----------------------------|---|-----------------------------|
| Immunogen | KLH conjugated synthetic peptide corresponding to a portion of human CHK2 | of the N terminal region of |
| Preservative Stabilisers | 0.09% Sodium Azide (NaN ₃) 2% Sucrose | |
| Buffer Solution | Phosphate buffered saline | |
| Preparation | Rabbit polyclonal antibody purified by affinity chromatography | on immunogen |
| Product Form | Purified IgG - liquid | |
| Target Species | Human | |

Specificity

Rabbit anti Human CHK2 antibody recognizes CHK2, also known as CDS1, LFS2 or RAD53.

In response to DNA damage and replication blocks, cell cycle progression is halted through the control of critical cell cycle regulators. The protein encoded by this gene is a cell cycle checkpoint regulator and putative tumor suppressor. It contains a forkhead-associated protein interaction domain essential for activation in response to DNA damage and is rapidly phosphorylated in response to replication blocks and DNA damage. When activated, the encoded protein is known to inhibit CDC25C phosphatase, preventing entry into mitosis, and has been shown to stabilize the tumor suppressor protein p53, leading to cell cycle arrest in G1. In addition, this protein interacts with and phosphorylates BRCA1, allowing BRCA1 to restore survival after DNA damage. Mutations in this gene have been linked with Li-Fraumeni syndrome, a highly penetrant familial cancer phenotype usually associated with inherited mutations in TP53. Also, mutations in this gene are thought to confer a predisposition to sarcomas, breast cancer, and brain tumors. This nuclear protein is a member of the CDS1 subfamily of serine/threonine protein kinases. Several transcript variants encoding different isoforms have been found for this gene (provided by RefSeq, Apr 2012).

Rabbit anti Human CHK2 antibody detects a band of 62 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

| Western Blotting | Anti CHK2 antibody recognizes a band of approximately 62 kDa in HCT116 cell lysates |
|----------------------------------|---|
| Storage | Store undiluted at -20°C, avoiding repeated freeze thaw cycles |
| Guarantee | 12 months from date of despatch |
| Acknowledgements | PrecisionAb is a trademark of Bio-Rad Laboratories |
| Health And Safety Information | Material Safety Datasheet documentation #10045 available at: https://www.bio-rad-antibodies.com/SDS/VPA00766 Antibody (10045) |
| Regulatory | For research purposes only |
