<b>Specificity</b>	<b>Rabbit anti Human phosphodiesterase 4D antibody</b> recognizes phosphodiesterase 4D, also known as cAMP-specific 3',5'-cyclic phosphodiesterase 4D.  This gene encodes one of four mammalian counterparts to the fruit fly 'dunce' gene. The encoded protein has 3',5'-cyclic-AMP phosphodiesterase activity and degrades cAMP, which acts as a signal transduction molecule in multiple cell types. This gene uses different promoters to generate multiple alternatively spliced transcript variants that encode functional proteins (provided by RefSeq, Sep 2009).  Rabbit anti phosphodiesterase 4D antibody detects a band of 91 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
