

Datasheet: VPA00773

| | |
|----------------------|------------------------|
| Description: | RABBIT ANTI ABCF1 |
| Specificity: | ABCF1 |
| Format: | Purified |
| Product Type: | PrecisionAb Polyclonal |
| Isotype: | Polyclonal IgG |
| Quantity: | 100 µl |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |

| Western Blotting | ▪ | | | 1/1000 |

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species

Human

Species Cross Reactivity

Reacts with: Mouse
N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Preparation

Rabbit polyclonal antibody purified by affinity chromatography on immunogen

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.09% Sodium Azide (NaN₃)
 2% Sucrose

Immunogen

Synthetic peptide directed towards the N terminal region of human ABCF1

| External Database Links | UniProt: Q8NE71 Related reagents Entrez Gene: 23 ABCF1 Related reagents |
| Synonyms | ABC50 |
| Specificity | <p>Rabbit anti Human ABCF1 antibody recognizes ATP-binding cassette sub-family F member 1, also known as ATP-binding cassette 50 (TNF-alpha stimulated), ATP-binding cassette sub-family F member 1, TNF-alpha-stimulated ABC protein and TNFalpha-inducible ATP-binding protein.</p> <p>The protein encoded by ABCF1 is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the GCN20 subfamily. Unlike other members of the superfamily, this protein lacks the transmembrane domains which are characteristic of most ABC transporters. This protein may be regulated by tumor necrosis factor-alpha and play a role in enhancement of protein synthesis and the inflammation process (provided by RefSeq, Jul 2008).</p> <p>Rabbit anti Human ABCF1 antibody detects a band of 110 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p> |
| Western Blotting | Anti ABCF1 antibody recognizes a band of approximately 110 kDa in NIH/3T3 cell lysates |
| Storage | Store undiluted at -20°C, avoiding repeated freeze thaw cycles |
| Guarantee | 12 months from date of despatch |
