

# Datasheet: VPA00800KT

Description:	HEAT SHOCK PROTEIN 90 BETA ANTIBODY WITH CONTROL LYSATE
Specificity:	HEAT SHOCK PROTEIN 90 BETA
Format:	Purified
Product Type:	PrecisionAb™ Polyclonal
Isotype:	Polyclonal IgG
Quantity:	2 Westerns

# **Product Details**

### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	•			1/1000

**PrecisionAb antibodies have been extensively <u>validated for the western blot application.</u> The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.** 

Target Species	Human	
Product Form	Purified IgG - liquid	
Preparation	20μl Rabbit polyclonal antibody purified by affinity chromatography on Protein A	
Buffer Solution	Phosphate buffered saline	
Preservative Stabilisers	0.09% Sodium Azide (NaN <sub>3</sub> ) 2% Sucrose	
Immunogen	Synthetic peptide directed towards the C terminal region of human heat shock protein 90 beta	
External Database Links	UniProt: P08238 Related reagents  Entrez Gene: 3326 HSP90AB1 Related reagents	
Synonyms	HSP90B, HSPC2, HSPCB	
Specificity	Rabbit anti Human heat shock protein 90 beta antibody recognizes the heat shock protein 90	

beta, also known as HSP90-beta, heat shock 84 kDa or heat shock 90kD protein 1 beta.

HSP90AB1 encodes a member of the heat shock protein 90 family; these proteins are involved in signal transduction, protein folding and degradation and morphological evolution. HSP90AB1 encodes the constitutive form of the cytosolic 90 kDa heat-shock protein and is thought to play a role in gastric apoptosis and inflammation. Alternative splicing results in multiple transcript variants. Pseudogenes have been identified on multiple chromosomes (provided by RefSeq, Dec 2012).

Rabbit anti Human heat shock protein 90 beta antibody detects a band of 90 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.

Western Blotting

Anti heat shock protein 90 beta antibody recognizes a band of approximately 90 kDa in HEK293 cell lysates

Please refer to the PrecisionAb western blotting protocol. For additional information on secondary antibody dilution and exposure time see product web page.

**Lysate Composition** 

**Instructions For Use** 

400µg HEK293 lysate lyophilized in RIPA buffer

- Lysate Reconstitution If using DDT reconstitute the lyophilized lysate with 190µl DI H<sub>2</sub>O, add 200µl 2x Laemmli Sample Buffer and 10µl 2M DTT.
  - If using BME reconstitute the lyophilized lysate with 180µl DI H<sub>2</sub>O, add 200µl 2x Laemmli Sample Buffer and 20µl BME.

Heat at 95°C for 5 minutes. For 10 well mini gels load 25µl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.

Storage

Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles.

Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.

Guarantee

As supplied, 12 months from date of despatch
