<b>Synonyms</b>	RNF84
<b>Specificity</b>	<p><b>Rabbit anti Human TRAF5 antibody</b> recognizes the TRAF5, also known as TNF receptor-associated factor 5 or RING finger protein 84.</p> <p>The scaffold protein encoded by TRAF5 is a member of the tumor necrosis factor receptor-associated factor (TRAF) protein family and contains a meprin and TRAF homology (MATH) domain, a RING-type zinc finger, and two TRAF-type zinc fingers. TRAF proteins are associated with, and mediate signal transduction from members of the TNF receptor superfamily. This protein is one of the components of a multiple protein complex which binds to tumor necrosis factor (TNF) receptor cytoplasmic domains and mediates TNF-induced activation. Alternate transcriptional splice variants have been characterized (provided by RefSeq, Jul 2008).</p> <p>Rabbit anti Human TRAF5 antibody detects a band of 64 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>
<b>Western Blotting</b>	Anti TRAF5 antibody recognizes a band of approximately 64 kDa in HeLa cell lysates
