**Specificity**

**Rabbit anti Human CD147** recognizes CD147 also known as basigin, OK blood group antigen, collagenase stimulatory factor or extracellular matrix metalloproteinase inducer.

The protein encoded by this gene is a plasma membrane protein that is important in spermatogenesis, embryo implantation, neural network formation, and tumor progression. The encoded protein is also a member of the immunoglobulin superfamily. Multiple transcript variants encoding different isoforms have been found for this gene (provided by RefSeq, Jul 2008).

Rabbit anti Human CD147 antibody detects bands of 37-58 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
