

Datasheet: VPA00874

Description:	RABBIT ANTI GSTM1
Specificity:	GSTM1
Format:	Purified
Product Type:	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click [here](#) to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Rabbit polyclonal antibody purified by affinity chromatography on immunogen
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide <50% Glycerol
Immunogen	Recombinant protein of human GSTM1
External Database Links	UniProt: P09488 Related reagents Entrez Gene:

Synonyms	GST1
-----------------	------

Specificity	<p>Rabbit anti Human GSTM1 antibody recognizes the glutathione S-transferase Mu 1, also known as GST HB subunit 4, GST class-mu 1, S-(hydroxyalkyl)glutathione lyase and glutathione S-alkyltransferase.</p> <p>Cytosolic and membrane-bound forms of glutathione S-transferase are encoded by two distinct supergene families. At present, eight distinct classes of the soluble cytoplasmic mammalian glutathione S-transferases have been identified: alpha, kappa, mu, omega, pi, sigma, theta and zeta. GSTM1 encodes a glutathione S-transferase that belongs to the mu class. The mu class of enzymes functions in the detoxification of electrophilic compounds, including carcinogens, therapeutic drugs, environmental toxins and products of oxidative stress, by conjugation with glutathione. The genes encoding the mu class of enzymes are organized in a gene cluster on chromosome 1p13.3 and are known to be highly polymorphic. These genetic variations can change an individual's susceptibility to carcinogens and toxins as well as affect the toxicity and efficacy of certain drugs. Null mutations of this class mu gene have been linked with an increase in a number of cancers, likely due to an increased susceptibility to environmental toxins and carcinogens. Multiple protein isoforms are encoded by transcript variants of GSTM1 (provided by RefSeq, Jul 2008).</p> <p>Rabbit anti Human GSTM1 antibody detects a band of 25 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.</p>

Western Blotting	Anti GSTM1 antibody recognizes a band of approximately 25 kDa in A431 cell lysates
-------------------------	------------------------------------------------------------------------------------

Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles
----------------	----------------------------------------------------------------

Guarantee	12 months from date of despatch
------------------	---------------------------------

Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories
-------------------------	----------------------------------------------------

Health And Safety Information	Material Safety Datasheet documentation #10049 available at: https://www.bio-rad-antibodies.com/SDS/VPA00874 10049
