

# Datasheet: VPA00909 BATCH NUMBER 180704

Description:	RABBIT ANTI PSMB1
Specificity:	PSMB1
Format:	Purified
<b>Product Type:</b>	PrecisionAb Polyclonal
Isotype:	Polyclonal IgG
Quantity:	100 μΙ

### **Product Details**

#### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	•			1/1000

The PrecisionAb label is reserved for antibodies that meet the defined performance criteria within Bio-Rad's ongoing antibody validation programme. Click <a href="here">here</a> to learn how we validate our PrecisionAb range. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependent on sample type.

Target Species	Human	
Species Cross Reactivity	Reacts with: Mouse  N.B. Antibody reactivity and working conditions may vary between reactivity is derived from testing within our laboratories, peer-repersonal communications from the originators. Please refer to further information.	eviewed publications or
Product Form	Purified IgG - liquid	
Preparation	Rabbit polyclonal antibody purified by affinity chromatography	on immunogen
Buffer Solution	Phosphate buffered saline	
Preservative Stabilisers	0.09% Sodium Azide <50% Glycerol	

Immunogen	Recombinant protein of human PSMB1
External Database Links	UniProt: P20618 Related reagents  Entrez Gene: 5689 PSMB1 Related reagents
Synonyms	PSC5
Specificity	Rabbit anti Human PSMB1 antibody recognizes the proteasome subunit beta type-1, also known as macropain subunit C5, multicatalytic endopeptidase complex subunit C5, proteasome beta 1 subunit and proteasome subunit HC5.
	The proteasome is a multicatalytic proteinase complex with a highly ordered ring-shaped 20S core structure. The core structure is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rings are composed of 7 beta subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome, the immunoproteasome, is the processing of class I MHC peptides. PSMB1 encodes a member of the proteasome B-type family, also known as the T1B family, that is a 20S core beta subunit. PSMB1 is tightly linked to the TBP (TATA-binding protein) gene in human and in mouse, and is transcribed in the opposite orientation in both species (provided by RefSeq, Jul 2008).
	Rabbit anti Human PSMB1 antibody detects a band of 24 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
Western Blotting	Anti PSMB1 antibody recognizes a band of approximately 24 kDa in NIH/3T3 cell lysates
Storage	Store undiluted at -20°C, avoiding repeated freeze thaw cycles
Guarantee	12 months from date of despatch
Acknowledgements	PrecisionAb is a trademark of Bio-Rad Laboratories
Health And Safety Information	Material Safety Datasheet documentation #10049 available at: <a href="https://www.bio-rad-antibodies.com/SDS/VPA00909">https://www.bio-rad-antibodies.com/SDS/VPA00909</a> 10049
Regulatory	For research purposes only
